

BridgeGate Health

“ The BridgeGate platform enables us to perform data integration with clients in a timelier manner with lower maintenance costs. When there are market opportunities for integration into the WorldDoc platform, we are able to show a proof of concept and deliver features quickly using BridgeGate. ”

- Ben Say,
Former CIO, WorldDoc

Revolutionary Universal Transformation and Exchange Technology Simpler, Faster, Accurate, Auditable

BridgeGateHealth provides robust integration solutions that quickly connect the many disparate applications and technologies that exist in healthcare and government organizations. Our any-to-any system integration solution reduces the length and complexity of integration projects, and enables legacy systems to be incrementally upgraded, so that existing investments are protected, while shifting busy IT staff to other important tasks.

Company Overview

- Founded in 1999, privately-held, founded in Jacksonville, Florida
- Over the past 15 years, the BridgeGate solution has facilitated millions of transactions globally, with implementations in the United States, Europe and Asia
- Backed by investors that include San Diego-based MedImpact Healthcare Systems, the nation's largest pharmacy benefit management (PBM) company that does not sell drugs, and which currently serves 32 million individuals nationwide
- BridgeGate is a leader in helping organizations follow all major industry and communication standards. Changes to industry standards, such as HIPAA, are automatically applied and multiple versions of standards can be maintained to accommodate all business partners.
- Patented Transformation and Workflow Engines
