

VorroHealth Joins the Strategic Health Information Exchange Collaborative Partner Program

Farmington, UT – November 21, 2017, VorroHealth, a leading provider of data exchange and transformation services, today announced it has joined the Strategic Health Information Exchange Collaborative (SHIEC) as a Strategic Business and Technology (SB&T) Partner. SHIEC is the national trade association representing health information exchanges (HIEs).

VorroHealth is assisting HIEs in extracting and transforming data from the long term post-acute care providers, smaller or specialty practices, and non-standard data sources. Many of these organizations do not have sophisticated technology, technical staff, or the financial resources to make the connections to HIEs. Using VorroHealth's BridgeGateHealth™ the health information exchanges have the ability to easily and cost effectively onboard this data.

VorroHealth was first introduced to SHIEC by a mutual partner, said Scott Sirdevan, CTO and Co-Founder of VorroHealth. Once we learned about the members of the collaborative and the goals and objectives of the organization, we knew we wanted to be part of this dynamic group. It is through the exchange of ideas, education and advocacy that we will make a positive impact on healthcare and VorroHealth wants to be part of this change.

“SHIEC is excited to have VorroHealth join the SB&T Partner program,” said Kelly Hoover Thompson, CEO of SHIEC. “SB&T Partners are selected based on their ability to bring unique, value-added solutions to our HIE community members. VorroHealth's ability to work with less traditional data has provided flexibility to the HIE community and given them the ability to expand their use cases. SHIEC looks forward to working with VorroHealth.”

About VorroHealth

VorroHealth provides robust, scalable integration solutions that connect disparate applications and technologies. BridgeGateHealth™'s any-to-any integration platform handles very complex data with virtually no coding required, reducing the complexity and length of integration projects to weeks or days resulting in lower costs. About SHIEC

SHIEC is the national trade association of health information exchanges (HIEs) and strategic business and technology partners. As the unbiased data trustees in their communities, the 50+ member HIE organizations manage and provide for the secure digital exchange of data by medical, behavioral, and social service providers to improve the health of the communities they serve. Collectively, SHIEC members serve almost 75% of the U.S. population.
